

FIG. 1

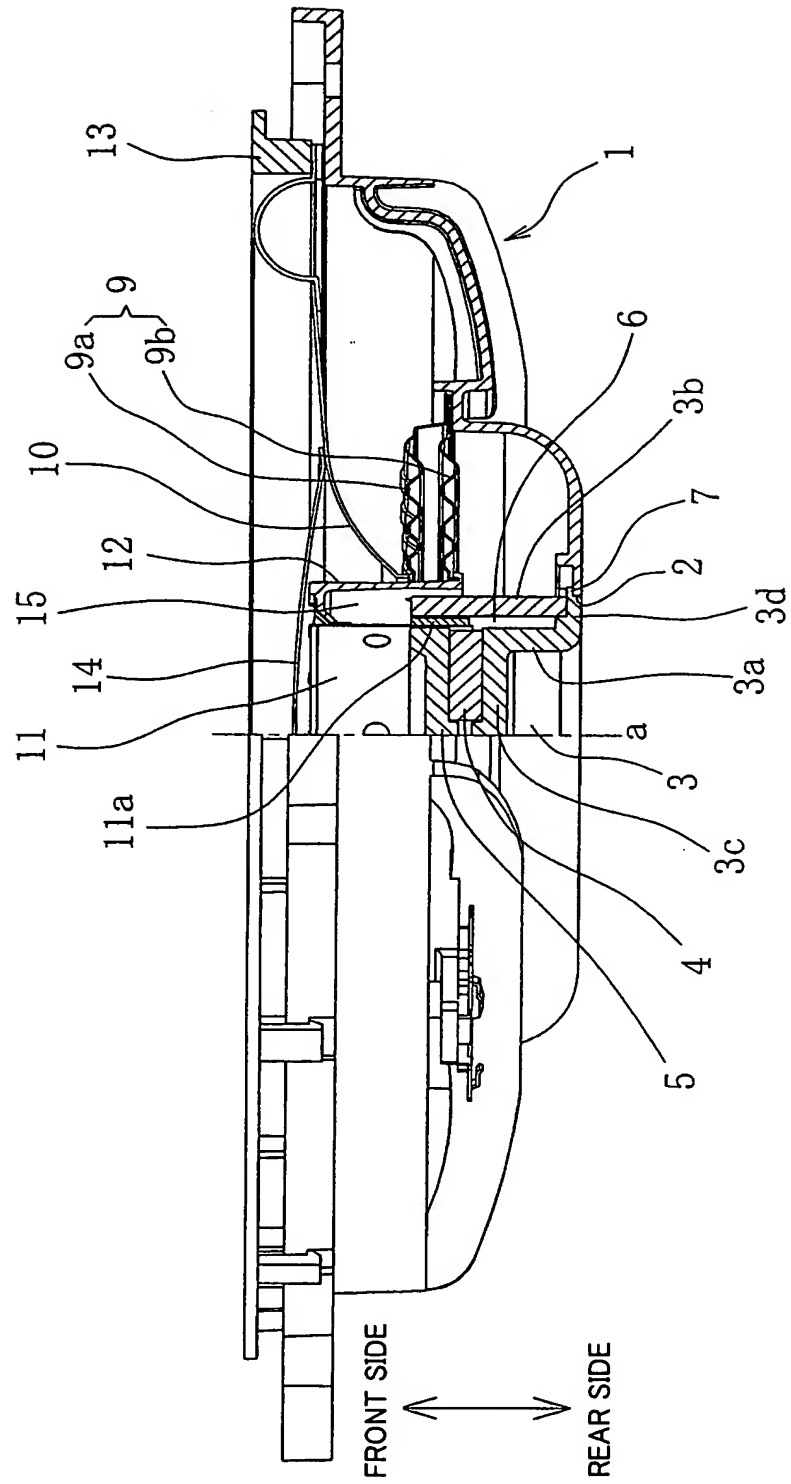

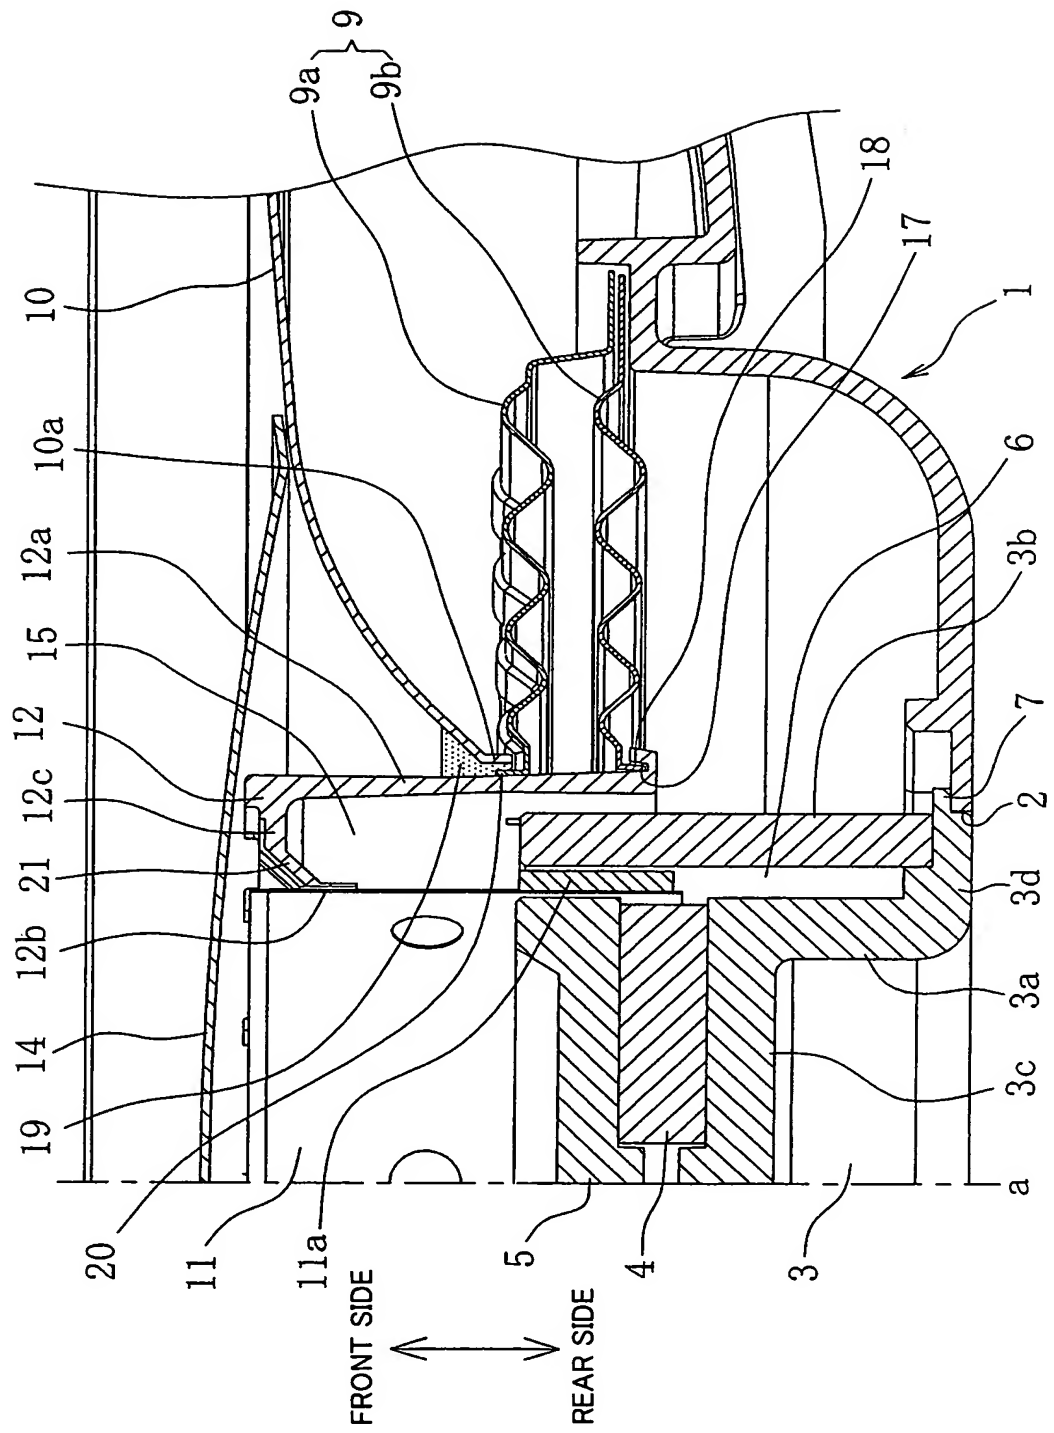

FIG. 2

This exploded perspective view illustrates the assembly of a circular electronic device. The components are arranged vertically, showing their relative positions and alignment. At the top is a circular cover (13) with a central opening (14) and a dashed center line (a). Below the cover is a circular base (10) with a central opening. In the middle are two stacked circular coils (9a and 9b), with a bracket (9) indicating they are part of a single assembly. Below the coils is a cylindrical component (12) with a flange. Below that is a cylindrical component (11) with a flange. At the bottom is a large circular base (1) with a central opening. Inside the base (1) are several components: a central cylindrical component (3) with a flange (3c) and a base (3b), a smaller cylindrical component (4) with a flange (5), and a circular component (7) with a central opening (2). A vertical double-headed arrow indicates the front side (top) and rear side (bottom) of the device.
